The Problem

Poor public safety infrastructure in India

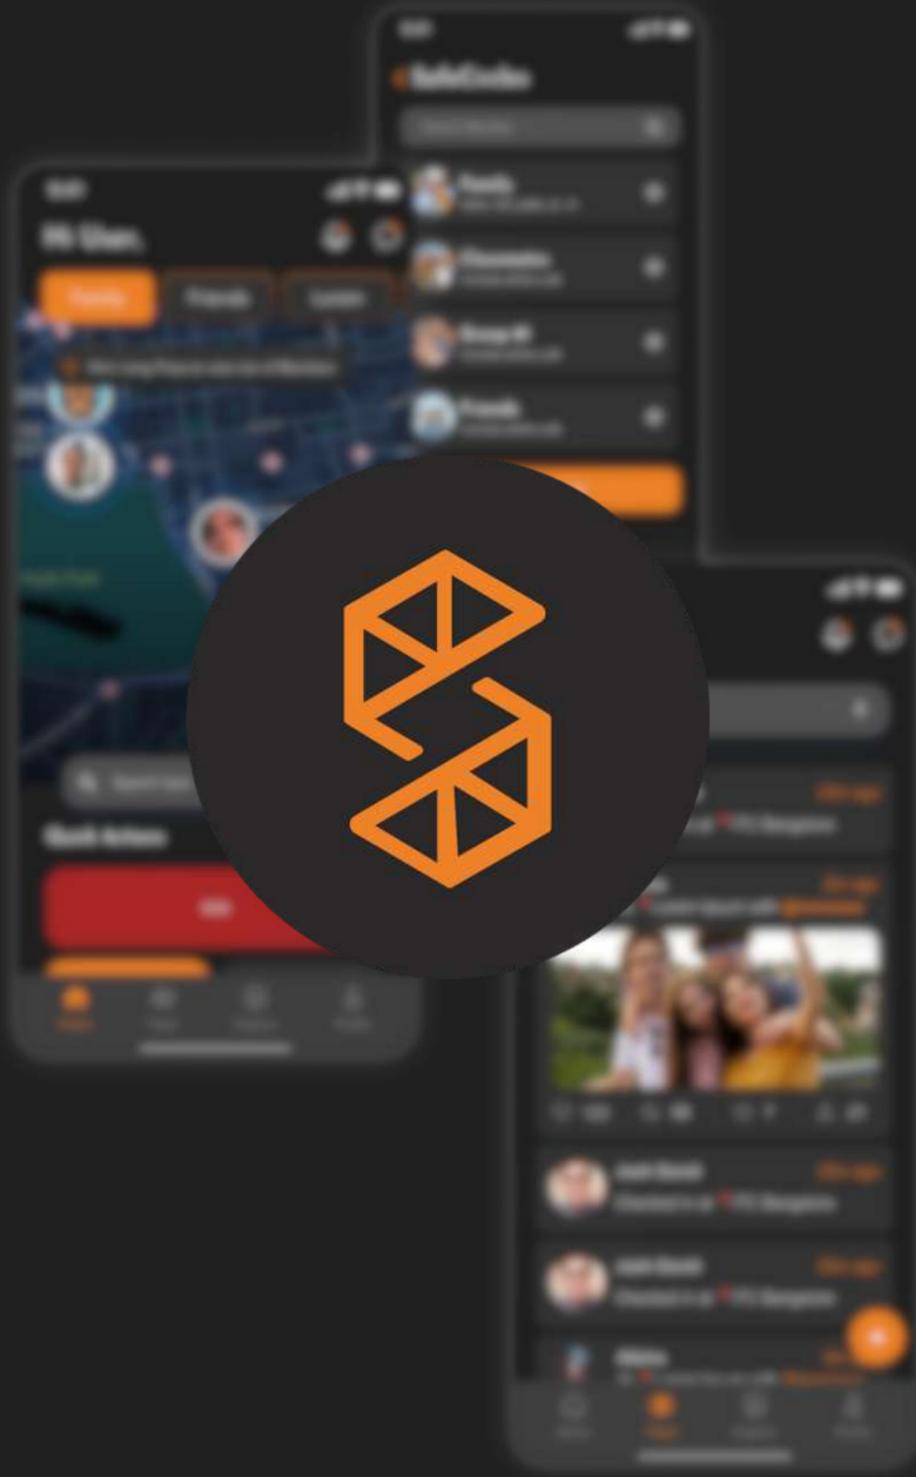

- Emergency response is often **slow or unreliable**.
- Crucial information is not reaching the right respondents.
- Lack of safety related information available to the public for better awareness and making safer choices.

Introducing, SafeStone

A **safety network** based platform that leverages a user's social network along with law enforcement authorities to connect them with the **nearest** and most effective sources of help available with the **click of a button**

Vision statement

“

Our vision is to make SafeStone a lifestyle brand, where personal safety is embraced. We aim to seamlessly integrate safety into daily lives, empowering users with real-time assistance, strong networks, and a sense of serene confidence. Together, we can foster a culture of security and peace.

”

Future plans

- Integrating **wearable products** to enhance user experience.
- Adapt our features for **B2B partnerships** for workplace safety, travel, hospitality, and more.
- Stronger **B2G partnerships** to improve public safety infrastructure using our mobile app as the foundation.
